Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claim 13 have been considered but are moot in view of the new ground(s) of rejection. The amendment filed 16 January 2007 placed remaining other claims 4, 6-10, 14, 16 and 17 in condition for allowance as noted below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Yamamoto et al. (US 5,731,741).

As to claim 13, Yamamoto teaches a controlling method comprising:

Outputting a frequency control word into a phase locked loop of a mobile station of a cellular telecommunications system, according to which frequency control word an output frequency is generated (figure 11, column 15, lines 1-25, programmable divider (104)),

Outputting a synchronized tuning word in parallel format into the phase locked loop in synchronization with the output of the frequency control word (figures 11-14,

column 15, lines 25-48, synchronization control unit (109) coupled to the programmable divider (104) and frequency comparison means (105)).

Allowable Subject Matter

Claims 4, 6-10, 14, 16 and 17 allowed. The following is a statement of reasons for the indication of allowable subject matter: As to claims 4, 6, 7, 8, 9, 14, 16 and 17, the prior art teaches an integrated phase lock loop for generating output frequencies comprising a frequency control unit for providing a frequency control word but does not also teach a tuning unit for providing a synchronized tuning word for the phase locked loop, the tuning unit being configured to output the synchronized tuning word into the phase locked loop in synchronization with a output of the frequency control word.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blane J. Jackson whose telephone number is (571) 272-7890. The examiner can normally be reached on Monday through Thursday, 7:30 AM-6:00 PM, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Urban can be reached on (571) 272-7899. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
